2. Federally Qualified Health Centers

A Federally Qualified Health Center (FQHC) can provide dental services for you or your family, regardless of your ability to pay. Services are offered on a sliding scale based on your income. Many people living in rural areas, or other communities where dental services are hard to find, depend on FQHCs for regular dental care.

3. Apply for Dental Lifeline Network

Dental Lifeline Network's Donated Dental Services (DDS) program helps people who need dental care but cannot afford it by connecting them with volunteer dentists and labs across the United States. Comprehensive dental treatment is provided at no cost (they do not provide cosmetic dental care).

To apply, you **must meet ONE of the following** criteria:

- 65 years of age or older
- Permanently disabled
- Require medically necessary dental care

In addition to meeting one of the above criteria, **further eligibility requirements** are below:

1. You can only receive services through the donated program once
2. You must exhaust all available dental insurance and benefits prior to receiving care through the donated program
3. Treatment is at the discretion of the volunteer dentist: services like sedation, implants and complex care may not be provided.
